

Commitment to Export Control Compliance

The University of California maintains an open academic environment in support of its mission of teaching, research, and public service. At the same time, U.S. export control laws and regulations prescribe and limit the conditions under which certain information, technologies, and commodities can be exported overseas to anyone, including U.S. citizens, or to a foreign national within the U.S. The University of California, Riverside ("UCR") is committed to full compliance with U.S. export control regulations and sanction laws (collectively, "Export Controls"), including without limitation the Export Administration Regulations ("EAR"), the International Traffic in Arms Regulations ("ITAR"), and regulations and orders administered by the Treasury Department's Office of Foreign Assets Control ("OFAC"). This commitment of compliance extends to all research and non-research activities covered by Export Controls and conducted at UCR or other locations by its faculty, academic appointees, staff, students, including student employees (collectively, "UCR Members") and non-employee participants in UCR programs.

To this end, UCR has established an Export Control Office within the office of Research and Economic Development. The mission of the Export Control Office is to aid UCR Members in their research and non-research activities to ensure continued compliance with applicable Export Controls and the University of California Export Control Policy. UCR recognizes that despite such efforts, irregularities or instances of non-compliance may arise. Achieving the highest standard of export compliance can only be met through the full participation of all UCR Members involved with export activities.

This commitment serves as a reminder to all UCR Members of their duty to abide by Export Controls and the Export Control Policy. Please report any suspected non-compliant activity that may lead to a possible violation to the Export Control Office and/or Chief Compliance Office for review. Additional information and training materials on Export Controls can be obtained through the Export Control Office website <https://exportcontrol.ucr.edu> or by contacting UCR's Export Control Office at exportcontrol@ucr.edu.
